Sintomi International Language Academy

Principal Susumu Kawabata

Regarding schedule changes etc. of "2020 Academic Calendar of SILA "associated with "Extension of emergency declaration regarding new coronavirus infectious disease (end of May)"

## 1 Background

On Monday, May 4, 2020, the "Emergency Declaration on New Coronavirus Infections" was extended until the end of May. In addition, "Proposal regarding school education activities based on the current situation of measures against new coronavirus infectious diseases by the Ministry of Education, Culture, Sports, Science and Technology" (May 1, 2020) also mentions the start of school educational activities in phases.

Based on related documents, this Academy has temporarily closed "from April 10 to May 6". Judging from these circumstances, we need to extend this temporary school closure period.

In addition, we would like to consider the preparation for the complete restoration of school affairs in this extension.

## 2 What to do next

This Academy will extend the temporary closure system until May31, following the basic purpose such as changing the schedule of the related documents. This extension period, we will flexibly manage school affairs while maintaining the distributed school day, and will be promoted to phase in the classes etc. toward the complete restoration of the Japanese language education system from June 1.

## 3 Operating procedure

### (1) General

The education system for this temporary extension period is divided into two phases: "1st phase: May 11 (Monday) to 20 (Wednesday)," 2nd phase: May 21 (Thursday) to 31 (Sunday)." In addition, considering the results of the practice exam conducted on Thursday, May 7, 2020, the class will be divided into 4 classes.

### (2) Work system and education

We will increase the number of lesson hours according to the phase of the education system for the extension of temporary school closures, and interfaced with the work system of full-time teachers and part-time instructor.

### (3) Prevention of new corona infection

As always, we will ensure sufficient spaces among students during the distributed school classes, encourage classroom ventilation and hand washing (install disinfectants), and distribute a mask once a week to all staff and students. In addition, we will collect, summarize, and inform the students about the latest information of "New Corona Infection Disease Prevention Measures" and " Special Cash Payments Application Procedures ".

## 4 Other

We show in a separate document for the details of the distributed school days include the assignments, and the duty of school staff.

The subject ends herewith.
